

Tochukwu Okeakpu

Frontend-Focused Fullstack Developer ReactJS/ExpressJS/MongoDB

okeakputochukwu9@gmail.com | [Github](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Frontend-focused Full-Stack Developer specializing in React, Next.js, TypeScript, express.js and modern web application architecture. Experienced in building production-ready user interfaces, improving performance, lazy loadings in a web application, integrating secure REST APIs, implementing authentication systems, and delivering scalable full-stack solutions. Passionate about Web3 technologies, developer tools, and creating high-performance user experiences.

SKILLS

- **Programming & Scripting:** Reactjs, TypeScript, Next.js, Expressjs, Mongodb, Solidity
- **Soft Skills:** Problem-Solving, Critical Thinking, Communication, Collaboration

EDUCATION

University of Nigeria Nsukka
Bachelor of science in Computer Science

Enugu Nigeria
Jan 2021 - Nov 2025

WORK EXPERIENCE

Blockchain developer
Agric-Tech
[deployed link](#)

Enugu Nigeria
Aug 2026 - Nov 2026

- Developed a blockchain based web application using with solidity serving a smart contract with React and tailwindcss as the frontend.
- Project is enables consumers to track details of farm products when purchasing them with aid of a Qr code
- Farm product details are stored on the blockchain for data integrity

Frontend Developer intern
ArchSaintNexus

Remote
Jan 2026-May 2026

- Developed responsive interfaces across multiple pages and reusable component systems for collaborative product development.
- Currently working with a team of developers building an event booking website

PROJECTS

Dev_collab
[deployed link](#)

- Architected and built a full-stack collaboration platform enabling developers to create projects, manage teams, assign tasks, and collaborate through a centralized dashboard.

- Developed responsive React/Next.js interfaces with TypeScript and implemented role-based authentication using JWT and React Context.
- Designed RESTful APIs with Express.js and MongoDB, supporting project workflows, file uploads through Cloudinary, and scalable team management features.
- Applied modular architecture patterns and reusable UI components to improve maintainability and future feature expansion.

Scroll Academy

[deployed link](#)

- Developed a blockchain based web application using solidity serving a smart contract with React and nextJs as the frontend.
- Project is used to educate newbies about Blockchain and their scroll blockchain network
- Data is being store on the blockchain for data integrity

Agro Market

[deployed link](#)

- Building a peer-to-peer agricultural marketplace with Node.js, Express, MongoDB, Next.js and TypeScript featuring role-based access for farmers and buyers, escrow-based payments via Interswitch, cryptocurrency payment support and real-time in-order chat using Socket.io
- Designed and deployed the full system end-to-end including RESTful API, MongoDB schema with optimised indexes, React Context-based auth, and a farmer dashboard with order tracking and revenue statistics, deployed on Render and Vercel
